SENTIMENT TRAJECTORY (EACH SNAPSHOT)

From mixed baseline → mid-window crash → final-week lift → post-final petitions

HOST & SPECTACLE SUCCESS SIGNALS

18% of runs scored sentiment ≥ 55

- Peak pride run: 68/100 (host logistics & welcome)
- Mexico atmosphere & final-week hype lifted mood
- On-pitch spectacle (final, bronze) drove engagement
- Best stretch late window after mid-July low of 28

FAN–OFFICIAL TENSION

80% of runs with divergence ≥ 70

- Avg gap 72/100 — fans vs FIFA/host frames
- VAR / referee distrust pulled sentiment to 28
- Ticket resale & access anger crowded organic fandom
- Post-final petitions kept gap elevated at close

ELENCHOS READ — SUCCESS IS SPLIT

On X, the tournament was not a single “success score.” Host organisation and on-pitch spectacle earned a clear late-window high (68), with 18% of monitoring runs in mildly positive-or-better territory (≥55). At the same time, average narrative divergence stayed high (72): fans repeatedly split from FIFA/host messaging on fairness and ticket access. Lowest mood (28) clustered around refereeing controversies and commercial noise — a structural gap, not a quiet final whistle.
